Key Features

- Lightweight aerodynamic hull design
- Strong 4mm thick ABS shell with a UV protection offers long lifespan, high shock resistance with innovative insulating properties
- Upgraded James Baroud, patented, aluminised 3-layer canvas reflects the harsh UV rays, is heat and water resistant and insulates in cold climates
- Fast 25 sec pop-up / 60sec pack-down
- 100% Blackout technology of the canvas provides comfort and privacy
- High pressure piston arms automatically assist the raising of the tent through the hydraulic articulated arms
- Removable Cargo Bars, great for surfboards, solar panels, kayaks and more
- Cargo Bars 70kg closed limit and 25kg limit on open tent
- Easy clamp attachment system
- Solar powered ventilation system to increase and aid airflow
- 360 degree panoramic views
- Wind tested up to 120km/h
- High density PVC latches that won't freeze or rust and make it easier to open and close
- Only 2 rear locks for easy open and pack down
- Accessory rail for James Baroud tunnel attachment
- 4 built in aluminium mounting rails
- Multiple internal storage solutions
- High-density 65mm mattress providing exceptional comfort
- Internal space to leave bedding, ladder and clothes in your closed tent
